PRODUCT DESCRIPTION

Check Encoder Maverick MICR VII Series Batch C.S.S. P.O.D. Encoding Machine Encoding items at the point of presentment saves time and money. The MICR VII encoder combines speed and ease of use in a small footprint to boost productivity and reduce check processing fees. The MICR VII will help you maximize savings generated when you process checks at the point of presentment. Simply key in the information and drop the document in the track; encode, list and update totals all in a single pass. Streamline your daily operations with one of Maverick's industry standard Batch, P.O.D., or Cash Settlement C.S.S. applications. Designed for maximum throughput, the MICR VII will easily meet your requirements for a fast accurate reliable MICR encoder, and is a drop in replacement for any Maverick MICR I or MICR II series encoder. Since the MICR VII runs nearly all existing Maverick MICREASE programs, it minimizes employee training. The MICR VII also incorporates new technology that allows it to encode 50 faster than older models. Your Maverick Representative can download your existing application or accommodate a custom program requirement on site.

ADDITIONAL FEATURES Multiple Batch P.O.D Item Fields Repeat Encode Acct. CDV CDG Batch Recall Register Teller Totals Clean Batch Listings Calculator Mode The MICR VII Batch C.S.S. P.O.D. Encoder offers keyboard programmability for maximum flexibility. No more expensive costs or lost time associated with programming changes that can only be done at the factory. The reliability of the state of the art circuit design, coupled with the mechanical integrity of the MICR VII eliminates downtime. The MICR VII is designed to meet or exceed rigid ANSI MICR encoding standards, the result is precision encoding which minimizes reader sorter rejects. The MICR VII also features a ribbon cartridge
