PRODUCT DESCRIPTION

Maverick MICR IV Encoder Endorsers REDUCE CHECK PROCESSING COSTS with a Maverick MICR IV series encoder. The MICR IV is perfect for financial institutions, merchants, and retailers. Financial Institutions who want to create, repair, or to clear checks, will find the MICR IV series invaluable due to its speed and convenience. Merchants and Retailers who encode checks prior to deposit will benefit from being able to bypass bank proof processing, eliminate proof fees, reduce float, and make their funds available sooner. Mavericks MICR IV series encoders are available in both P.C. driven and standalone configurations. This popular unit has been interfaced by most P.C. application providers and can be easily interfaced to your own application. Or, select our TR 4000 standalone configuration, which has dozens of applications designed to fit your needs. The encoder features a state of the art high speed CPU technology, encodes at speeds up to 60 documents per minute, an integrated autofeeder 250 300 hopper capacity, and has the smallest footprint in the industry. It is a worldwide favorite. MICR IV S4 Series Models M 405 P.C. Driven Encoder features a built in auto feeder and is typically used in Batch, Clearing Operations, and P.O.D. environments. It is popular with Financial Institutions and Retailers. An inkjet endorse option is available. M 406 P.C. Driven Encoder features a built in auto feeder and is typically used in Retail and Cash Settlement environments. It comes with both a production handfeed and built in autofeed. Operators can easily move from autofeed to hand feed and back again. It provides optimal flexibility when used by several operators with different work styles. This model is popular with Merchants, Mail Order Houses and a variety of Retailers. And an inkjet endorse option is available. M 425 Standalone System features a

built in auto feeder and is typically used in Batch, Clearing Operations, and P.O.D. environments, and comes with a built in application of your choice. It is popular with Financial Institutions and Retailers. An inkjet endorse option is available. M 426 Standalone System features a built in auto feeder and is typically used in Retail Cash Settlement environments. It comes with a built in application of your choice, along with a production hand feed and a built in auto feed. Operators can easily move from autofeed to hand feed and back again. It provides optimal flexibility when used by several operators with different work styles. This model is popular with Merchants, Mail Order Houses and a variety of Retailers. An inkjet endorse option is available. M 435 Standalone System includes the same features as the M 426 except without the hand assist feeder. The unit has additional ports for currency counters and coin sorters. FEATURES Exception Field Encode Full Field Encode Repeat Code Acct.
