### PRODUCT DESCRIPTION

Maverick M 366 Exception Item MICR III Series Encoder Encoding exception items at the point of entry saves time and money. The MICR III Series M 366 Encoder is a compact robust Check Encoder that can meet your requirements for an accurate and reliable MICR Exception Item Encoder. Simply key in the information and drop the document in the track. The MICR III will encode the MICR code line exactly to ANSI specifications required for check processing. Program functions directly through the keyboard, snap in a ribbon, and begin encoding with minimal operator training. The MICR III Series M 366 is also a space saver, with a footprint the size of a piece of paper. 8.5 x 11 The MICR III Series M 366 Encoding Machine will improve customer service by allowing you to encode items at the branch level such as lobby deposits, counter checks, bonds, or repair an item for reprocessing. The Maverick MICR III Series M 366 Check Encoding Machine will save valuable time and money by allowing you to present qualified items to the proof department. With minimal space requirements, the MICR III Series M 366 Check Encoder provides the optimal cost effective solution for exception item encoding.
